Alcohol, hepatitis C screening and hepatic fibrosis in drug users

Published On: May 22, 2019 | Pages: 004 - 009

Author(s): Di Nino F, Chaffraix F, Schaeffer M and Doffoel M

Background: In drug users, viral hepatitis C, alcohol abuse, and drug use are three interconnected public health challenges. Methods: This study assessed the impact of alcohol on hepatitis C screening and hepatic fibrosis in this patient population. In total, 934 substance users were included and divided into three groups: Group A, alcohol use disorder only (n = 511) ...
