Pathogenesis and complications of non-alcoholic steatohepatitis and its management by nutraceuticals

Published On: February 27, 2024 | Pages: 001 - 003

Author(s): Sahar Y Al-Okbi*

Non-Alcoholic Steatohepatitis (NASH) is a real health problem that is commonly associated with obesity and diabetes. Cardiovascular diseases, liver carcinoma, and liver failure might develop from NASH if not well managed. The present article deals with the pathogenesis of non-alcoholic steatohepatitis and its complications in addition to exploring the importance of us ...
